# Ideation document for individual assignment

This is the link for the Individual assignment Git repository:
https://git.fhict.nl/I499773/individual-project-nazim-ahmedov-s2

The project is going to be about movie reviews. The web application is going to contain movies to which users will be able to read and write, read reviews and also rate the movies. They can also remove and update their written reviews. Inspiration will be taken from IMDb: https://www.imdb.com/?ref_=nv_home.

The Win Forms application will serve as the admin side. Admin will be able to create, see, update and delete movies. Moreover, the admin is capable of adding users, seeing their information, editing their details and removing users.
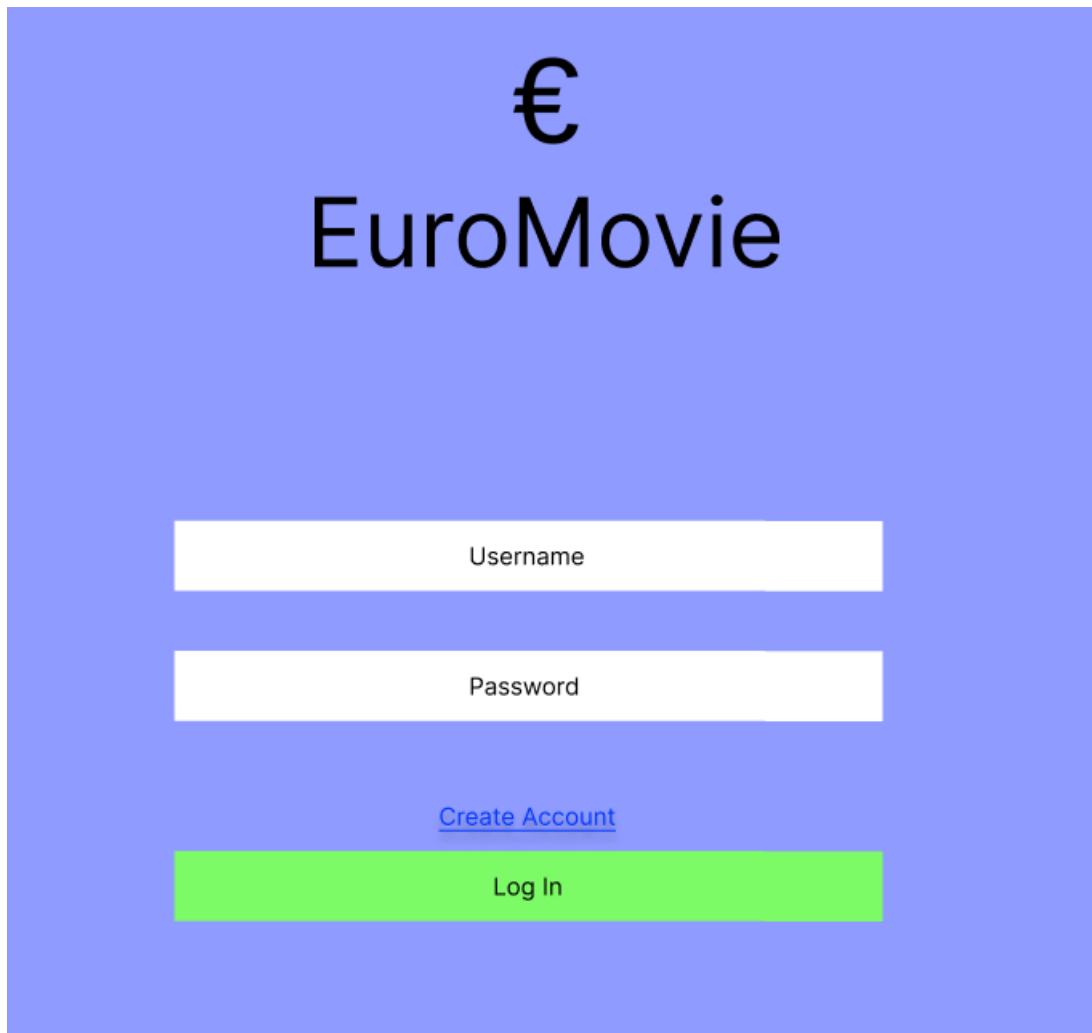

Note: the website is not going to be identical to IMDb. it will only be used for inspirational purposes and will not look the same nor have every single feature of the website.

A wireframes page example:

This will be the Homepage/Landing page of the web application.

This is the Mainpage. You will be able to search movies or sort movies by genre as well as get into your account, contact and about page. If you press the movie picture it will take you to the MoviePage where you can read more about the movie and check it's reviews. Movies will be sorted by genre for starters.
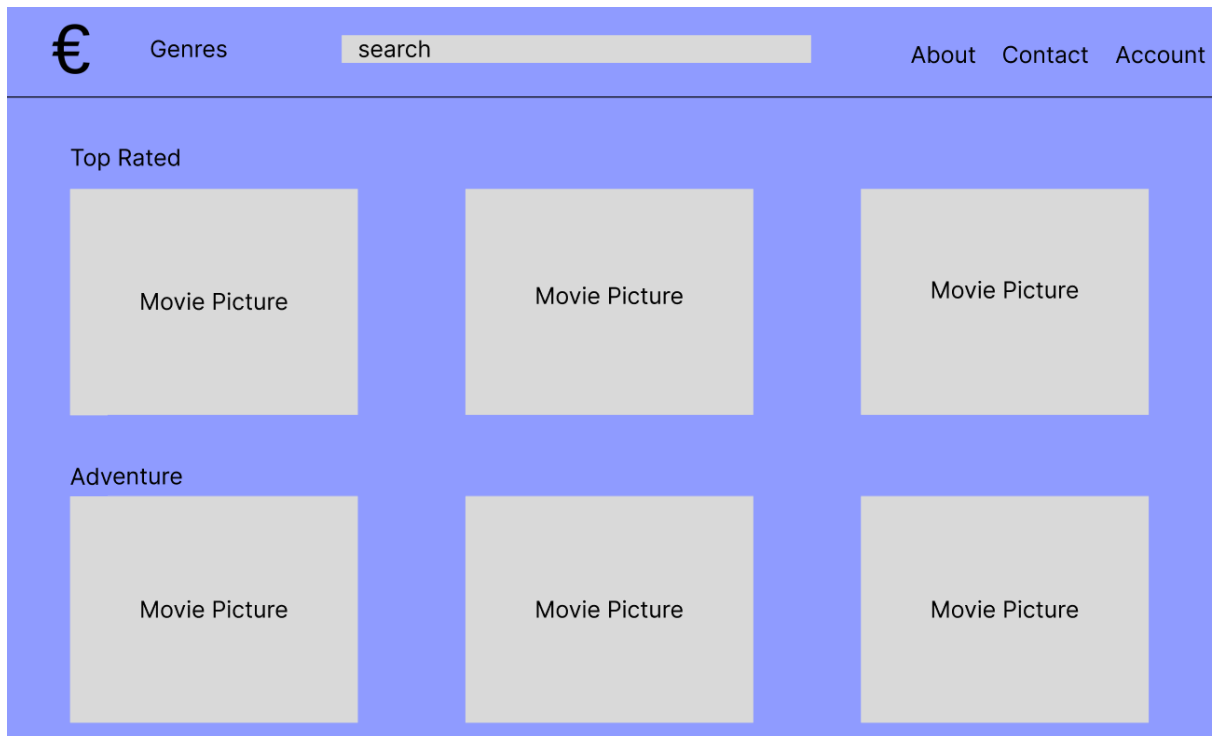

This is the MainPage of the Win Forms Application. Here you will have 4 buttons which redirect you to your desired Form. Add movie button takes you to a form where you are able to create a movie. The Check Movie button helps you see every movie that there is in the application. Add User helps you add a User manually. Check Users button lets you see every user available.
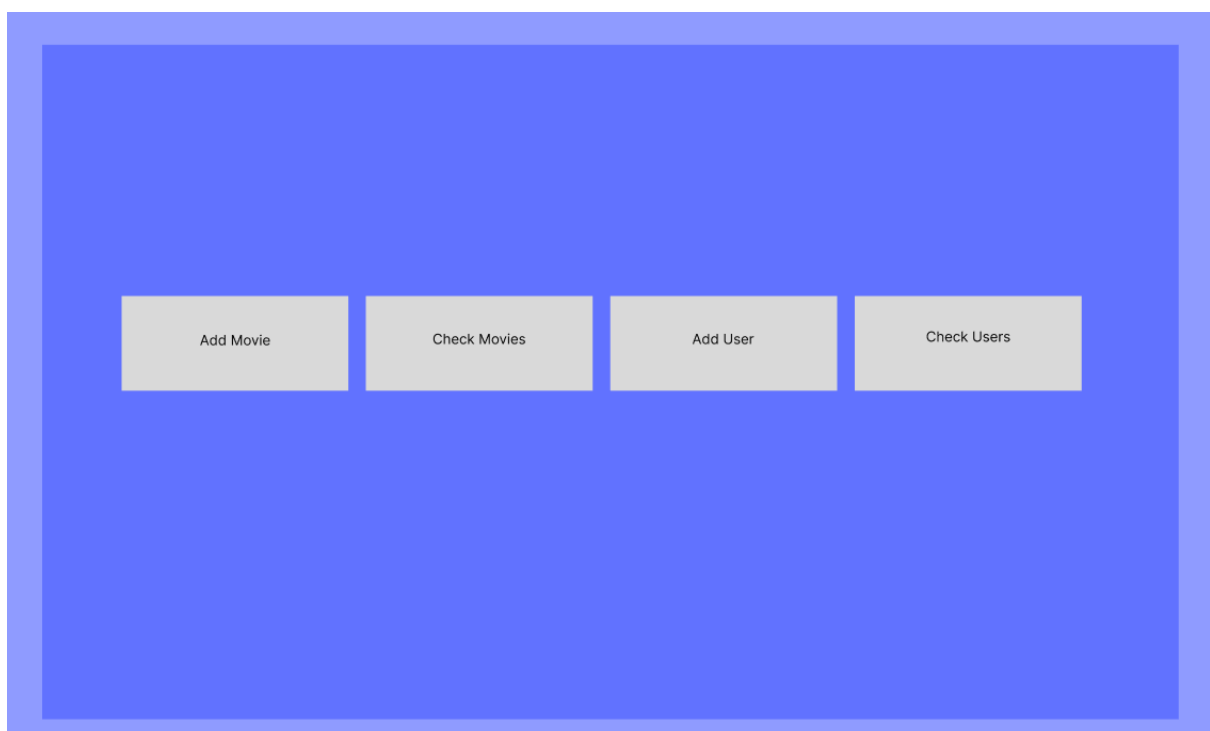

This is the Check Movies Form. Here you will be able to see every movie in the app. If you need to check, edit or delete a movie you need to mark it by double tapping on it. After that you press one of the two buttons on its right.

List of Movies

Edit Movie

Delete Movie

Note: This document describes only the idea. The web application might face changes depending on the teacher feedback and/or possible future improvements.
